Mohammad Amin Talaghat, Ph.D.

Head of Technical Office & Contracts | Contracts & Technical Affairs Manager |
Ph.D. Construction Management (Amirkabir) | Digital Twin & AI

Ph.D. (Amirkabir University of Technology) and DigiPave researcher at the University of Oulu, Finland, bridging Q1-published research in AI-driven digital twins with a decade of hands-on leadership in construction, technical office and contract management.

PROFESSIONAL PROFILE

Civil engineer and construction management professional who combines **international research in AI-driven digital twins** with **senior industry experience** in project controls, technical office leadership and contract administration. Co-founder and CEO of a construction-contracting company and Head of Technical Office & Contracts at Sahar Sazeh Novin Paydar. Experienced in delay and disruption claims, quantity surveying, interim and final payment statements, price adjustment and new-rate analysis, CPM scheduling and earned value management. Ph.D. research produced an implemented road pavement digital twin for the City of Oulu, Finland, published in *Automation in Construction*, *Scientific Reports*, *ASCE Journal of Computing in Civil Engineering* and the *International Journal of Pavement Engineering*. Builds practical tools across BIM, computer vision, data analytics and agentic-AI automation to deliver faster, verifiable engineering outcomes.

PROFESSIONAL EXPERIENCE

Head of Technical Office & Contracts | Contracts & Technical Affairs Manager
Jun 2025 – Present

Sahar Sazeh Novin Paydar · Shiraz, Iran

- Leads the technical office and contract function: correspondence, progress reporting, estimation, contract records and claim evidence.
- Prepares and reviews quantity take-offs, interim payment statements, variations, new-rate and price analyses, and project control deliverables.
- Prepared the delay and damages claim and the schedule update for the 3,300 t/day Fars Cement Factory (Kharameh).

Ph.D. Researcher / Research Collaborator — DigiPave
Jan 2024 – Present

University of Oulu · Finland (hybrid) · Visiting Researcher on site, Oct 2024 – Apr 2025

- Designed and implemented an AI-driven road pavement digital twin and maintenance decision-support system for the City of Oulu.
- Integrated georeferenced inspection data, computer vision, deep learning, BIM/IoT concepts and maintenance optimization into deployable workflows.

Co-Founder, CEO & Project Manager
2019 – Present

ArkaNoyan Industry Development Co. · Shiraz, Iran

- Directs construction-contracting and engineering operations: execution, planning, cost control, financing and commercial follow-up.
- Leads multidisciplinary teams across the technical, financial and contractual aspects of building and infrastructure projects.

CORE EXPERTISE

Project Controls · Contract Management · Delay & Claims · Digital Twin · AI / Deep Learning · Quantity Surveying · Cost Estimation · Payment Statements · Price Adjustment · CPM & EVM · BIM / IoT · Computer Vision · Pavement Management · Asset Management · Structural Design · Risk & BOT Finance · QA/QC · HSE · Tender Documents

SOFTWARE

PLANNING & COST

MS Project	●●●●●
Primavera P6	●●●●○
Taksa (QS & statements)	●●●●●
MS Excel · VBA · Office	●●●●●

BIM · CAD · STRUCTURAL

AutoCAD	●●●●○
Revit (BIM)	●●●●○
ETABS · SAFE · SAP2000	●●●●○
Tekla Structures	●●●○○
Civil 3D · InfraWorks	●●●○○
Blender · Photoshop · XD	●●●○○

DATA · AI · CODE

Python (PyTorch, scikit-learn)	●●●●○
YOLO · OpenCV · Diffusion	●●●●○
MATLAB · RapidMiner · Weka	●●●○○
React · PHP/Laravel · JS	●●●●○

EXPERIENCE (CONTINUED)

Founder & Director — Web and Software Platforms
2016 – Present

WebAlfa and **Tarnamagostar Pars Labkhand** · Shiraz, Iran

- Designs and develops web platforms and engineering applications (UI/UX, React, PHP/Laravel, Python), including WebAlfa, BIMGate, Paprika and TwinUp.

Technical Office & Project Controls Supervisor
Apr 2025 – Jun 2025

Arshsazan Negin · Shiraz, Iran

- Supervised technical office workflows, quantity surveying, scheduling, documentation and site–design–management coordination.

Contract Affairs Expert
Jan 2022 – Jan 2024

Iran Gas Engineering & Development Co. (NIGC Eng.) · Tehran, Iran

- Contract affairs, risk analysis, project finance and BOT studies for oil, gas and infrastructure projects; research on fair risk allocation and contractual structures.

Technical & Execution Supervisor
2020 – 2021

Peynavardan Shahr Co. · Shiraz, Iran

- Supervised execution, site coordination, technical documentation and quality follow-up for construction works.

Technical Office & Project Controls Engineer
2018 – 2019

Debleh Construction Co. · Tehran, Iran

- Prepared schedules, progress control documents, quantity surveying reports, technical submittals and project coordination documents.

Executive Engineer · Site Supervisor
2015 – 2017

Peynavardan · **Borje Korneshe Foolad** · **Tarh-e Mana Shahr**

EDUCATION

Ph.D., Civil Engineering — Construction Engineering & Management
2021 – Jan 2026

Amirkabir University of Technology (Tehran Polytechnic) · Dept. of Civil & Environmental Engineering

Dissertation: Development of a digital twin-based intelligent decision support system for asphalt pavement maintenance. Supervisors: Dr. Amir Golroo, Dr. Vahid Shahhosseini.

Visiting Researcher (Funded Fellowship) — DigiPave Project
2024 – 2025

University of Oulu, Finland · Centre for Wireless Communications · Road pavement digital twins and AI-driven infrastructure monitoring.

M.Sc., Civil Engineering — Construction Engineering & Management
2017 – 2020

K. N. Toosi University of Technology · Faculty of Civil Engineering (Ranked 3rd in Cohort)

Thesis: A building energy management system integrating BIM and IoT to improve efficiency in public buildings.

B.Sc., Civil Engineering
2011 – 2016

Shiraz University

SECTOR EXPERIENCE

01 Industrial plants & cement	02 Oil, gas & energy infrastructure	03 Mass housing & mixed-use
04 Roads, pavements & railways	05 University & public buildings	06 Smart cities & digital platforms

AGENTIC AI

- LLM agents (Claude Code)
- Model Context Protocol
- Agentic CAD/BIM automation
- AutoCAD · Revit · Tekla via MCP
- MSP · Excel automation
- RAG & knowledge bases
- Prompt engineering
- Document AI for contracts

LANGUAGES

Persian — Native ●●●●●

English — Professional ●●●●○

HONORS

National Elites Foundation Award
Talented students' award, Iran, 2021

Ranked 20th nationwide
Iranian Ph.D. Entrance Exam, 2021

Ranked 3rd
M.Sc. cohort, Construction Engineering & Management, 2020

Ph.D. Visiting Scholar
Funded fellowship, University of Oulu, 2024–2025

LICENSES

Licensed Construction Supervisor & Executor (Grade 3)
Iran Construction Engineering Organization

TRAINING

- HSE
- ETABS / SAFE design
- Revit / BIM
- AutoCAD
- MATLAB programming
- Python data mining & ML
- MS Project
- Taksa QS & statements

SELECTED PROJECTS

Road Pavement Digital Twin — DigiPave
Decision-support system for pavement maintenance, City of Oulu, Finland (Business Finland).

Fars Cement Factory · 3,300 t/day
Delay and damages claim and project schedule, Kharameh, Iran.

Q Mixed-Use Complex · 170,000 m²
Delay claim documentation, Khorramabad, Iran.

Mehr Housing · 1,210 units · 120,000 m²
Project planning and controls, Pardis City.

60-ha Site Works · Mehr Housing
Quantity surveying and cost estimation, Pardis City.

BIM/IoT Energy Management
Smart-building energy system for Roger Williams College, Florida, USA.

Railway Condition Assessment
YOLO-based vision and georeferenced maintenance intelligence, Zanjan–Tehran line.

Shiraz University ECE Faculty · 6,000 m²
Construction of the Electrical & Computer Engineering Faculty building.

6-Storey Residential · 2,000 m²
Architectural drawings and structural design, Shiraz.

Digital Platforms
WebAlfa, BIMGate, Paprika and TwinUp: design and development.

CODES & STANDARDS

General Conditions of Contract
Circulars 5090 · 173073 · 4951
Iranian National Building Code
Standard 2800 (seismic)
ASTM D6433 (PCI)
AASHTO 1993
PMBOK
DCMA 14-point

RESEARCH FOCUS

Infrastructure digital twins
Pavement distress segmentation
PCI estimation
Generative & self-supervised AI
Maintenance optimization
Explainable deterioration models
BIM/IoT energy
Contract risk allocation

CONSULTING & SERVICES

Claims & Contracts
Delay and disruption claims, EOT, contract review, variations, dispute support.

Technical Office
Quantity take-off, estimates, interim/final statements, price adjustment, new rates.

Project Controls
WBS, CPM schedules in MSP/P6, EVM, S-curves, progress and PMO reporting.

BIM & CAD
Revit modelling, AutoCAD/Tekla drawings, MTO, IFC-based coordination.

AI & Digital Twin
Computer vision, predictive models, dashboards and decision support for assets.

Research Support
Q1 manuscripts, data analysis, code implementation, revision and peer response.

DIGITAL & AI CAPABILITIES

Agentic Engineering Automation

- LLM agents (Claude Code) orchestrating AutoCAD, Revit, Tekla, MS Project and Excel through Model Context Protocol (MCP) connectors
- Automated take-off, scheduling and reporting pipelines with human review gates
- Document AI for contracts, correspondence and claim evidence

Computer Vision & Digital Twins

- Distress detection and segmentation (YOLO, diffusion-based augmentation, self-supervised learning)
- Automated crack quantification and PCI estimation (ASTM D6433)
- Georeferenced asset data fused into digital-twin decision support

Data, Platforms & Decision Support

- Predictive deterioration and maintenance-optimization models (MLP–LSTM, explainable AI)
- Web platforms and dashboards: WebAlfa, BIMGate, Paprika, TwinUp
- Python, React and Laravel applications for engineering teams
